

## Professional Pet Sitter Amanda 🐾🐾

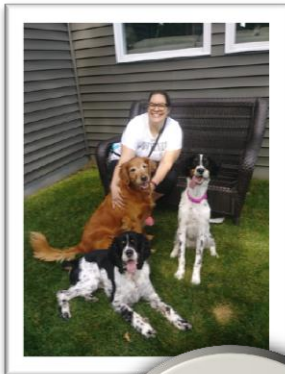

I currently live in Coon Rapids with my boyfriend of six years, Nathan, and our four, "pawed" children. We adopted our two oldest cats, Venus and Virgil, four years ago from the Humane Society. They came from the same home and were both just over a year old. Our two youngest cats, Vernon and Vera, came to us during the Covid pandemic. Through friends, we heard about a litter of kitties that needed a home—we immediately fell in love with them and they also became part of our furry family!

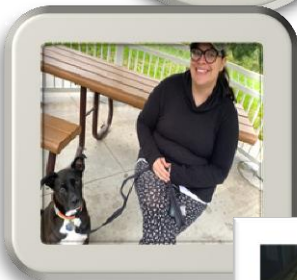

I am originally from the St. Cloud area, and dog and cats were always part of our household. After receiving my Associates Degree in Business

Management, I primarily worked in the customer service and office administrative professions, but have always been a natural caregiver.

So I made the decision to become a personal care assistant and have never regretted the change of career path. I find helping others with their day-to-day tasks is incredibly rewarding. I have also lived with and cared for my grandma and father before they passed. In addition to my work as personal care assistant, I have also been a pet sitter and dog walker over the last twelve years—first for family and friends and then professionally as my experience, reputation and referrals increased.

I believe in treating other's pets with the same love and respect I would treat my own. I am motivated and devoted to helping pets receive the care, exercise and love they deserve. In addition to experience with special needs and service dogs, I also am versed in administering medications.

In my spare time, it is very important for me to spend time with family and friends. I also enjoy experiencing new restaurants--especially Vietnamese and Indian cuisine. But many of my most favorite moments are spent relaxing on the couch while watching a movie and cuddling with my cats!
