

Professional Pet Sitter Denise 🐾🐾

I live in North St. Paul with my husband and my two teenage boys. I also have an adult daughter, who currently resides in St. Paul. We also have two female American Shorthair tuxedo cats named Boo and Chubby. They have become our babies!

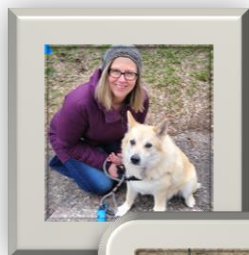

Ever since I was a child, I have had a soft spot for animals and wanted to bring home every stray I possibly could. One winter, my brother found an injured rabbit on the side of the road during his paper

route. I wrapped it in a blanket and gave it water using a medicine dropper. Ever since then, my nurturing characteristics came out in full force for any animal who needed me. I have had dogs and cats for all my life and even had an albino rat!

Prior to being a pet sitter, I have had experience working as a para-educator in a school system as well as an extended day care giver for adults with disabilities and with school aged children, aged 5-11.

My son, Hayden, and I have volunteered at Caring for Cats in North St. Paul because we both love cats so much and wanted to give back to our community. We have had two dogs in our family. Archie, a yellow lab and Jasper, a black lab whom we loved very much. It's always been important to me to have my children grow up with—and care for—pets because it gives them opportunity to foster compassion and nurturing for others, people and animals alike.

My family and I spend as much time together as possible, and I cherish every moment. We enjoy going to church functions, staying at our cabin in Wisconsin, playing card games or being outside together.
